Once again CAT is proving why we are the technology leading spray gun manufacturer with the newest compliant technology on the market. The CPR spray guns from CAT combine the transfer efficiency of HVLV with the speed and finish quality of conventional air spray. The nozzle requires 11 cfm at 29 PSI recommended inlet pressure. The CPR guns are available in both pressure feed and gravity feed versions and include the new CPR air cap and HVLV air cap, along with 3 different needle and nozzle sizes, multi-purpose wrench, nozzle wrench, cleaning brush and mini regulator. These kits will also be available with your standard pressure and gravity cups or the popular 3M PPS.
